Apply filters to SQL queries

Project description

My organization has tasked me with filtering out databases to investigate potential security issues and to update computers. In the following project, I used Structured Query Language (SQL) to filter out and query a database for various security-related tasks.

Retrieve after-hours failed login attempts

A potential security-related issue occurred after business hours, 6 pm. Many failed login attempts occurred following 6 pm. First, I selected all the data columns I wanted to view using the code SELECT *. Then I used the code FROM log_in_attempts to select the relevant table. Finally, I used the code WHERE login_time > '18:00' AND success = FALSE to specify all the data after 6 pm that resulted in a failed login attempt (0).

-> FROM log_in_attempts -> WHERE login_time > '18:00' AND success = FALSE;

Retrieve login attempts on specific dates

A suspicious event happened on May 9th, 2022. I'm tasked with retrieving all the login attempts that occurred on May 9th, 2022, and May 5th, 2022. First, I selected all the data columns I wanted to view using the code SELECT *. Then I used the code FROM log_in_attempts

to select the relevant table. Finally, I used the code WHERE login_date = '2022-05-09' or login_date = '2022-05-08' to retrieve data in that specified time frame.

Retrieve login attempts outside of Mexico

I'm tasked with retrieving login data that did not originate from Mexico. First, I selected all the data columns I wanted to view using the code SELECT *. Then I used the code FROM log_in_attempts to select the relevant table. Finally, I used the code WHERE NOT country LIKE 'MEX%' to filter out Mexico. The table contained both entries, such as 'MEX' and 'MEXICO', which meant I had to pair the LIKE operator with 'MEX%' to successfully filter out Mexico.

Retrieve employees in Marketing

I'm tasked with retrieving all the data for the Marketing department for offices located in the East building. First, I selected all the data columns I wanted to view using the code SELECT *. Then I used the code FROM employees to select the relevant table. Finally, I used the code WHERE department = 'Marketing' AND office LIKE 'East%' to specify the marketing department and all offices located in the East building.

```
MariaDB [organization]> SELECT *
    -> FROM employees
    -> WHERE department = 'Marketing' AND office LIKE 'East%';
 employee id | device id

Retrieve all employees not in IT

I'm tasked with retrieving employee data that is not part of the Information Technology department (IT). First, I selected all the data columns I wanted to view using the code SELECT

*. Then I used the code FROM employees to select the relevant table. Finally, I used the code

WHERE NOT department = 'Information Technology' to exclude the IT department from the data.

<pre>MariaDB [organization]> SELECT * -> FROM employees -> WHERE NOT department = 'Information Technology'; +</pre>

Summary

Throughout this activity, I applied a variety of SQL queries to filter a database. I used two tables: log_in_attempts and employees. I used a variety of operators, including LIKE, NOT, OR, and AND. Additionally, I used the wildcard (%) to filter out patterns.
